LINALYL FORMATE

Description

Linalyl formate is a naturally occurring compound commonly found in essential oils like lavender and bergamot. As a monoterpenoid, it possesses a delightful citrusy, sweet, and fruity aroma, making it a popular choice in perfumes and cosmetics. Beyond its aromatic qualities, research has delved into its potential anti-inflammatory and antioxidant properties, adding to its allure.

This versatile compound finds its way into a variety of products, including air care products, biocides (such as disinfectants and pest control products), perfumes and fragrances, polishes and waxes, washing and cleaning products, as well as cosmetics and personal care items. Its broad applicability underscores its significance in the fragrance and chemical industries.

Regarding safety, a Safety Data Sheet (SDS) for linalyl formate would provide comprehensive information about its hazards, safe handling procedures, storage requirements, and disposal guidelines. It serves as a crucial resource for ensuring proper usage and minimizing risks associated with its handling and storage.

LINALYL FORMATE

Product Name: LINALYL FORMATE

Qaroma Code: 1032824

CAS Number: 115-99-1

FEMA Number: 2642

Characteristic:

Purity (%)

Gas Chromatograph

Odor

Specification:

95 to 100

PASSES TEST

FRESH, HERBACEOUS,
SLIGHTLY WOODY
ODOR.

Refractive Index (@20c)

1.4531.458

Specific Gravity (@25c)

0.9100.918

Color/appearance

Colorless Liquid

Additional Product Information:

Flash Point: 187 °F

Shelf Life: 6 Months

Storage Conditions: Stable when stored in its original package, tightly sealed in a cool (46-90°F) and dry location out of direct heat and light.
