STRAWBERRY FURANONE 20% IN ETHYL ALCOHOL

Description

Qaröma's new Strawberry Furanone 20% in Ethyl alcohol presents a solution of strawberry furanone, an organic compound utilized in both the flavor and perfume industries, dissolved in ethyl alcohol, a commonly employed solvent and disinfectant. Also known as Furaneol, strawberry furanone is a derivative of furan renowned for its sweet, caramel-like, and fruity aroma. Naturally occurring in strawberries, pineapples, tomatoes, and various other fruits, it contributes significantly to their distinctive fragrances.

Artificially synthesized, strawberry furanone finds widespread use as a flavoring agent in a diverse array of products, including beverages, candies, baked goods, dairy items, and cosmetics. The formulation of Strawberry Furanone 20% in Ethyl alcohol represents one of the available forms of this compound, offering versatility in creating or enhancing different flavors and fragrances across multiple applications.

SAFETY DATA SHEET Strawberry furanone 20% Ethyl alcohol- a document that provides detailed information about the hazards, handling, storage, and disposal of strawberry furanone 20% ethanol.
