## LIME OIL DISTILLED 2-FOLD

### Description

Lime Oil Distilled, Citrus Aurantifolia Peel Oil Distilled is distilled from acidic epicarps after the pressing the juice from the fruit of the Lime. The oil is a yellowish liquid that is insoluble in water which can be used as a flavor or an essential oil.

The oil holds a myriad of uses and benefits. Its vibrant, citrusy scent makes it a popular choice in aromatherapy, where it's known for its uplifting and refreshing properties. In addition to its aromatic qualities, lime oil offers several other practical applications:

**Aromatherapy:** Lime oil is commonly used in aromatherapy to promote a sense of well-being, reduce stress, and uplift mood. Its invigorating aroma can help alleviate feelings of fatigue and mental fog.

**Topical Use:** When properly diluted, lime oil can be applied topically to the skin. It's often used in massage oils, lotions, and creams to refresh and revitalize the skin.

**Flavor:** In controlled and diluted forms, lime oil can be added to beverages or used as a flavoring agent in cooking.

**Fragrance:** Lime oil's bright and citrusy aroma makes it a popular choice in perfumery. It's often used as a top note in fragrances, adding a fresh and uplifting element to scented products.

**Supplements:** Lime oil has a rich history, dating back centuries. It was used by British naval soldiers to prevent scurvy, a disease caused by vitamin C deficiency.

Overall, lime oil is a versatile essential oil with a range of potential benefits, from aromatherapy to skincare to culinary applications. However, it's essential to use it safely

and responsibly, following dilution guidelines and seeking professional advice when needed.

SAFETY DATA SHEET Lime oil distilled 2-fold - a document that provides detailed information about the hazards, handling, storage, and disposal of Heptanal cyclic ethylene acet

## LIME OIL DISTILLED 2-FOLD

### Specification

**Product Name: LIME OIL DISTILLED 2-FOLD**

**Qaroma Code: 1040924**

**CAS Number: Mixture**

**FEMA Number: N/A**

**Characteristic:**

Optical Rotation (@25c)

Gas Chromatograph

Odor

**Specification:**

20.00          30.00

PASSES TEST

CHARACTERISTIC ODOR

Refractive Index (@20c)

Specific Gravity (@25c)

Color/appearance

1.4750          1.4850

0.8700          0.8800

YELLOW LIQUID

**Additional Product Information:**

**Flash Point:** 147 °F

**Shelf Life:** 36 Months

**Storage Conditions:** Stable when stored in its original package, tightly sealed in a cool (46-90°F) and dry location out of direct heat and light.
